

# A thing I made

**W**as the title of English Language homework for Waldorf Lyceum students in Semily during the super-strict Covid lockdown in March 2021.

“**D**uring the lockdown I learned to cook new recipes. I took over the cooking sceptre. There were no extra hard recipes. Mostly just some new vegetable soups, pasta salads, sweet food like healthy banana pancakes, but I am still proud of myself for my culinary skills. I would like to learn some sauces or some healthy vegetarian foods.

My grandmother had a birthday this weekend, so I made these little glasses. It is tiramisu. There is only cottage cheese, biscuits, some good fruit such as bananas, strawberries topped with cinnamon. It's simple, but I have to say it's delicious.”

Veronika Brožová, Class X.

„**I** made this teapot during lockdown.

The process began at the end of November, but the final adjustments and the completion have only just finished. It's nothing special, but I think it's a nice gift for my mom.”

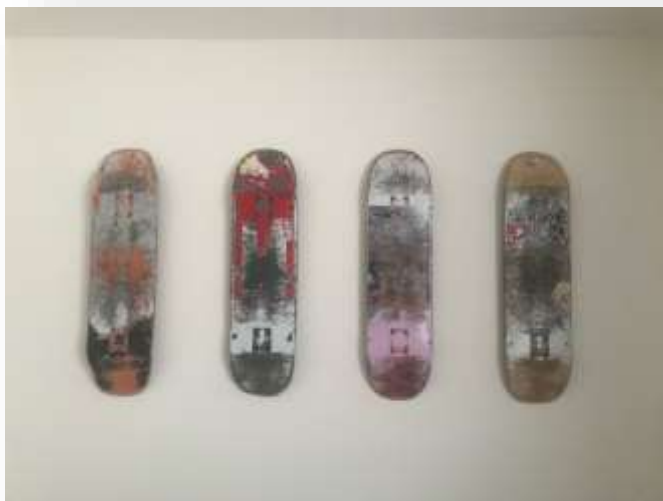

David Bajer, Class X.

**I** am not sure I made something own except playing guitar, some photos and stuff for school. But, I have drawn two A3 format pictures for Art Class, which I'm proud of.

The first is a portrait of my classmate for the whole 9 years of elementary school and Kindergarten too, and the second one is a sketch of "Zelný Trh" square (in Brno centre) from the roof of one building, where I go sometimes with friends or alone when I feel bad. So I will post these two pictures."

Mikuláš Bartůšek, Class X.

**I** took my old broken skateboards and put them up on the wall above my bed. I found this inspiration on the Pinterest.

Matyáš Kvíčala, Class X.

This is screen from one video I've edited for youtuber called Opat04. It takes long time to do your edit exactly how you want it and how someone for whom you do it wants it. It's a little stressful because you have to finish it on time, but it's really funny and I enjoy this hobby. " Tomáš Maňák, Class X.

At the beginning of 2021 I started growing avocados.

Mariana Mojslová, Class X.

I'm building a museum during quarantine. A few months ago, I got the premises from the town hall, and now I'm slowly redoing it there. It was an old ugly apartment, so we turn it into the only city museum.

If it turns out well, it will be furnished there as a First Republic gendarmerie station and another room with a variable exhibition. The opening was planned for May 15, 2021, which would be exactly 130 years since the opening of the first gendarmerie station in Jablonec, but it will probably not happen due to coronavirus measures. So I'll see....

Vladimír Petříček, Class X.

## Bike renovation:

This is my renovated bike Favorit. I was working on it last week, because two weeks ago we finished my small workbench in the cellar.

I actually started this project almost one year ago,

but it was at the beginning of the summer holidays. I didn't have any working place, so I had to work outside the house in the yard. But still I've been doing some work. I stripped it of all the components and repaired the frame with varnish and transparent matte varnish. After this the bike was waiting almost all of the winter, till now.

These days the bike is finally finished (there are just some little things which I could improve) so now I can use it for bicycle road trips.

Jakub Smetáček, Class XI.

This was a coconut pie, which I baked last month. There was a vanilla corpus with coconut-mascarpone cream and grated coconut and almonds on top. I baked it for my sister's nameday. I never made this cake before, but I've tried the individual parts before.

Irena Plischkeová, Class XI.

I have made a few damascus blades, one short sword, one silver amulet and I have grinded two jam stones. I have also tried some engraving into a steel and copper inlay.

Most of these products are not yet ready  
**Filip Mikule, Class XI.**

Kristýna Krausová Class XI.”

Well, I decided to take up a challenge during the lockdown. I said I would bake a desert every week. Actually, it is going very well. I started to enjoy trying out new recipes. So I made a really good banana bread, chocolate brownies, cheesecake with fruit and a red velvet cake, which turned out pink.

Tichý,  
Class  
XI.

During quarantine I made a climbing hangboard for training. It helps build your finger strength.

On the same note I made few climbing holds (one of them is on the second photo), and I'm planning on making a small climbing wall in the backyard.

Today we want to present you our a new piece of clothing that should end up in your closet. It's a sweater which is inspired by famous JW Anderson Cardigan which became famous mainly because Harry Styles wore it and all his fans want it after that. Because I don't have money and I wanted it so bad I had to do it by myself at home. I crocheted it for about six days, made up the instructions, and used up ten balls of yarns.

As you can see on our model, this sweater is very colourful, comfortable and can easily warm you up so you will not want to take it off.

Magdaléna Bušáková, Class XI

Rabbit hutch and rabbits breeding.

It's scary that we're already more than year at home, with some not really long breaks. Its also almost a year that I built a rabbit hutch and I got my first pair of rabbits, it was in April last year. During the summer and autumn I bred my first generation of the Záholický rabbit.

We ate them during the winter.:D I also got 2 small guinea pigs from Marky, so they are in the hutch with the rabbits.

Now I'm waiting for the next generation. Timon Drahoňovský, Class XI
